

Ingestion Edge Cases

Separate validation fixture | Intentionally malformed values and parsing controls | Do not merge into the main demo

Schema: Transaction Date / Transaction Reference / Amount / Currency / Transaction Text

Each physical table row is one test record. Empty cells are intentional. Expected outcomes are in the separate guide.

Transaction Date	Transaction Reference	Amount	Currency	Transaction Text
2026-02-30	DQ-90001	12500.00	NGN	Impossible calendar date
08/09/2026	DQ-90002	13500.00	NGN	Ambiguous day and month order
	DQ-90003	14500.00	NGN	Missing transaction date
2026-08-18	DQ-90004	12000.00	NGN	Letter O inside numeric amount
2026-08-18	DQ-90005		NGN	Missing transaction amount
2026-08-18	DQ-90006	15500.00	ZZZ	Currency outside configured allowlist
2026-08-18	DQ-90007	16500.00		Missing currency in multicurrency extract
2026-08-18	DQ-90008	1.250,50	EUR	Locale-dependent amount punctuation
2026-08-18	DQ-90009	1,250.50	USD	Thousands separator in raw amount
2026-08-18	DQ-90010	(2750.00)	NGN	Parentheses used to indicate a debit
2026-08-18	DQ-90011	1250.005	NGN	Excess precision beyond two decimal places
2026-08-18	DQ-90012	17500.00	NGN	
2026-08-18	DQ-90013	18500.00	ngn	Lowercase currency code
2026-08-18	000000008142	19500.00	NGN	Leading zeros must survive database ingestion
2026-08-18	DQ-90015	20500.00	NGN	Alpha & Beta / INV-90015; "Priority" delivery. This deliberately long narration wraps within a single table cell and must remain one transaction with all words, punctuation and identifiers retained.
2026-08-18	DQ-90016	0.00	NGN	Zero-value informational entry
